YAU App Feedback - Apr 23, 2026

MOBILE APP

- UI Should be exact or very close to the images provided.
- Complete Twilio Registration
- On the registration page of the mobile app - we do not need the location line.
    - Location needs to be removed
- The keyboard does not move out of the way when finishing typing in the selected fields and the registration page should be designed based on the images we provided.
- Please design the login screen
    - For the login screen allow members to use their email address as the username and create a password
    - Add forget a password and give admin a way to send a password reset link from admin to the member from the Google space email address.
- On the registration page - there should be only 4 sports for the drop down selection: (You should be able to select more than 1 sports)

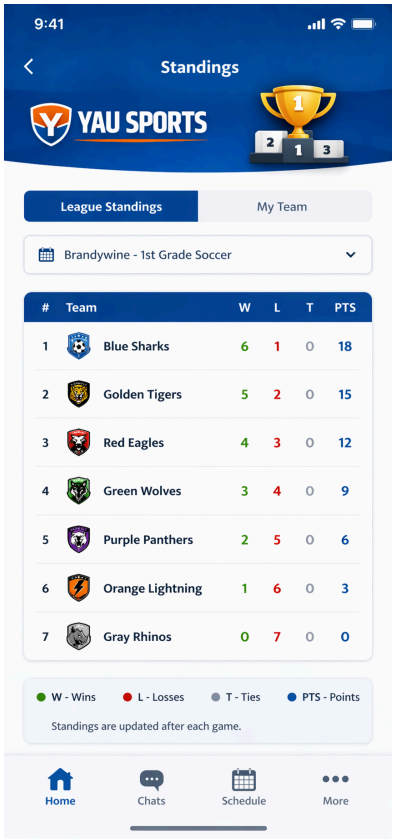
    Flag Football
    - Soccer
    - Cheer
    - Basketball

- Terms and Conditions need to be a pop up link. See Attachment
- We need a check box or yes and no based on twilio's language about sending text messages.
- The Standings section is missing from both the app and the admin panel. Here's how the standing should look.
- Schools not showing up in real time on the registration page for the app. When I added a new school on admin it did not show up on the app when registering. For example, if i add a new school - it does not show up in as a school selection in the registration process when a member registers on teh app.

There needs to be a read format or messages on the app. In other words, when a user opens their messages once opened the user needs to know that the message was read.

And they need a way to respond to messages and receive ad response from admin - this should all be push notifications NOW and twilio in Phase 2

- Also, it should be a pop up number saying new message like a 1,2,3 red circle, etc.



- On the registration page - the Grades need to change to Select Grade(s) - Here are the selections (we call them Grade Bands)
    - K / 1st Grade
    - 2nd / 3rd Grade
    - 4th / 5th Grade
    - Middle School (6th, 7th, 8th Grade)

- Favicon needs to change - see example above.
- Messages, Standings and

ADMIN PANEL

STANDINGS IS missing from the admin panel.

Admin Panel Section - Schools

Under Schools when editing an institution - Admin panel will not allow me to update the registration if closed or open or closed (The tab when editing an already existing school is not working.

When editing the registrations if the registration is closed - members should still be able to sign up however they should be placed on a waiting list - this can be done in Phase 2 - for now, keep the feature.

Admin Panel Section - Messages

Members/users should be able to respond to messages via that app and receive a response from the admin in real time.

School Selection - when sending messages - under target audience - schools/placements - The schools should be the same schools from the schools section even if we add a new school - it should still populate here in real time.

- Under target audience - Grade BAnds should be
    - K / 1st Grade
    - 2nd / 3rd Grade
    - 4th / 5th Grade
    - Middle School (6th, 7th, 8th Grade)
- Sports Categories should be:

    - Flag Football
    - Soccer
    - Cheer
    - Basketball

- Admin needs to be able to send select messages to multiple of all categories or (select all) grades, schools and even everyone in the messaging center. For example, If i want to send message to only Brandywine, K/1st Grade Soccer and Send the same messages to Allenwood, Flag Football, Grade 4th/5th
- Message Center - We should be able to see the messages sent in the admin panel in a - Messages list.

Admin Panel Section - Members

- Create a way to bulk delete the members (as a matter of fact remove all the members that did not test through the app.

- On Admin panel -Member section needs to show the following details then have an icon to open to see more detail in this order:

Student(s) Name (even is more than 1)
School
Grade Band - Example 2nd/3rd Grade
Sport(s) - Example - Football, Soccer, etc.
School Name Parent Name
Parent Phone Number

- Parent Email

All other data should populate on the students detail page.

Admin needs to be able to edit the member - For example we may need to change

There needs to be a read format or messages on the app. In other words, once opened the user needs to know that the message was read.

ADMIN PANEL - Game Schedule

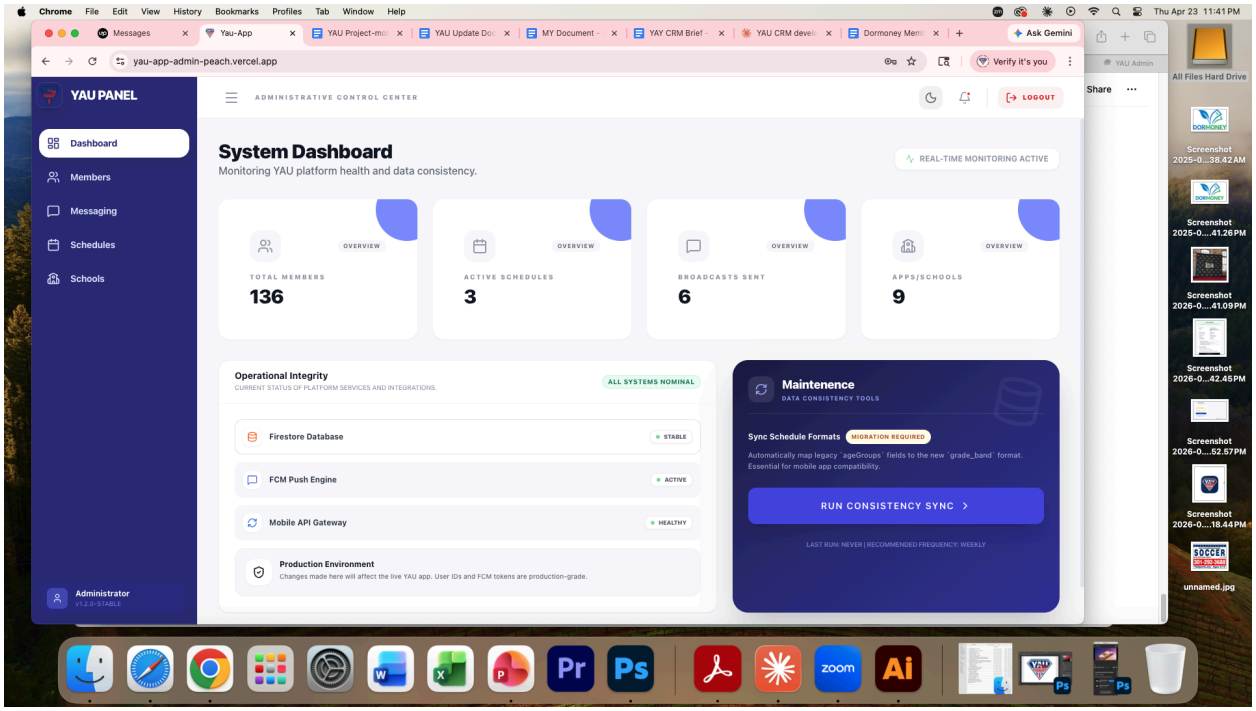
When scheduling games - the home and away teams should be drop downs based on the schools/programs even if we add new ones all in real time.

The grades should be based on the grade bands

- K / 1st Grade
- 2nd / 3rd Grade
- 4th / 5th Grade
- Middle School (6th, 7th, 8th Grade)

Sports should be:

- Flag Football
- Soccer
- Cheer
- Basketball

We need a way to bulk delete games


ADMIN PANEL - DASH BOARD - This is what the dashboard looks like now. I'm not sure what this is but it needs to change. Claude give me some recommendations to give th developer
